coaching and innovation mentoring

PROGRAM | CINNAM LEADERSHIP MENTORING JOURNEYS

Our Executive Leadership Mentoring program is based on the systemic approach LeadershipCoaching@Livella®.

The Program is offered in two versions. The first one is designed for Executives and Professionals in various organizational and institutional roles who need to exercise and enhance their leadership. The second one is intended for Coaches and Mentors who will guide current or future Leaders throughout their careers.

The LeadershipCoaching@Livella® Model emphasizes leadership competencies, their systemic integration, and adaptability across different contexts and situations. It supports Leaders in defining their behavioral and strategic leadership style, which is naturally influenced by their personality, character, values, professional ethics, and commitment to sustainability.

The Program goes beyond traditional training by providing tailored insights, coaching, and strategic feedback to enhance the Mentee's ability to lead effectively. It focuses on issues such as self-awareness, emotional intelligence, communication, decision-making, resilience, and vision-setting, all of which are essential for effective leadership.
