

## REFERENCE | BEHAVIORAL COACHING | ANTONIO

“At the end of this experience, I feel that I have clearer ideas, that I am more aware of my position in the professional environmental context, about the role I hold and what is expected of those who hold this role, and, last, but not least, what I want.

Iveta has led the path in a masterly way, always working at a level of depth that is difficult to manage, at a level that must not be too introspective/psychological, which is pertinent to other professionals, I believe, but not even "simply" technical", without giving answers directly, but asking me questions and analyzing the situations I experienced, in order to allow me to reach the most useful conclusions "autonomously", to achieve my goals.”
